

Criterion 7: Continuous Improvement

7.1 Feedback System

The institution has a robust feedback mechanism to ensure continuous improvement:

- Student Feedback: Collected twice a semester for each course regarding teaching methodology, syllabus coverage, and clarity.
- Alumni Feedback: Collected annually during the Alumni Meet. Suggestions are used to update curriculum and training programs.
- Employer Feedback: Collected during placement drives to assess the employability skills of students.

7.2 Academic Audit

An Internal Quality Assurance Cell (IQAC) conducts academic audits at the end of every semester. The audit reviews course files, lesson plans, question paper quality, and CO-PO attainment levels.

7.3 Improvements based on CO-PO Attainment

If a Course Outcome (CO) does not meet the target attainment level, the faculty proposes corrective actions. For example, in CS305 (Operating Systems), target attainment for CO2 was not met in 2023. Corrective action: Additional tutorial classes and practical simulation exercises were introduced in 2024, resulting in improved attainment.

7.4 Infrastructure Upgrades

Based on industry trends and alumni feedback, the AI & Data Science lab was established with an investment of Rs. 25 Lakhs.
